GitHub: <https://github.com/goshornjustin/> | Portfolio: <https://goshornjustin.github.io/>

Mobile Development specialist with 3+ years delivering production cross-platform applications across defense, fintech, and IoT industries. Proven track record of taking apps from zero to App Store launch in under 90 days and reducing bugs by 90% through comprehensive testing strategies. Experienced bridging Flutter with native Android and iOS layers including JNI, Dart FFI, and Bluetooth integrations.

Skills

Mobile & Integrations: Riverpod | Flutter Bloc | Deep Linking, QR/Barcode Scanning | 2D Animations | Rive animations | Hive | USB Serial | Bluetooth | Push Notifications | Dart FFI | Method Channels

Languages & Frameworks: Flutter | Dart | React Native | Kotlin | Swift | Java | C#

Backend & APIs: SQL | NoSQL | Firebase | Supabase | .NET Libraries | Encryption | Offline Storage

Tools & Practices: Agile | CI/CD | Git | Automated Testing | Technical Documentation | Clean Architecture

Experience

MARCH 2026 – MAY 2026

MOBILE DEVELOPER (CONTRACT) | WILCOX INDUSTRIES CORP. | REMOTE

- Architected and delivered an Android application enabling end users to configure a Close Quarters Sight.
- Integrated real time reticle configurations via Bluetooth and USB using JSON RPC returning reticle data from the firmware under 800ms in worst cases.
- Architected a flexible data model supporting multiple weapon profiles with up to three customizable reticles each, enabling tailored configurations per operational scenario.
- Integrated JNI method channels to leverage a ballistics library for high-precision ballistic calculations, bridging Flutter and native Android layers.
- Integrated offline data storage using Hive to retain reticle configurations across sessions without connection dependency.
- Designed and implemented custom widgets and views to meet strict UI/UX specifications, ensuring precise reticle rendering and intuitive user interaction.
- Worked with a team of 10 electrical, mechanical, and firmware engineers to ensure 100% accuracy with reticle components and design.
- Application delivered and pending DoD contract award.

OCTOBER 2025 – MARCH 2026

MOBILE DEVELOPER (CONTRACT) | ONE TANK PROPANE MONITORING SOLUTIONS | REMOTE

- Converted legacy Android and iOS application into a cross-platform Flutter production app actively being used by 100+ One Tank customers.

- Integrated real-time tank monitoring through REST API giving the app load times of 200ms for tank lists exceeding 50 entries.
- Designed custom gauges, widgets, and graphs for intuitive visualization of real-time customer tank data.
- Integrated real-time alerts and push notifications to proactively warn customers of low tank levels and anomalies.
- Created offline user data caching and encrypted storage for sensitive customer account credentials as per One-Tank customer safety requirements.
- Live on app stores under the name One-Tank Pulse Monitor.
 - Apple Store: <https://apps.apple.com/us/app/one-tank-pulse-monitor/id6761924171>
 - Google Play: https://play.google.com/store/apps/details?id=com.lpg_tank_solutions.one_tank

SEPTEMBER 2025 – NOVEMBER 2025

MOBILE DEVELOPER (CONTRACT) | POPSTOCK EDUCATIONAL SERVICES | REMOTE

- Converted Android/Kotlin MVP into a cross-platform Flutter production app.
- Integrated real-time stock trading, in-app currency, and live market data, gamifying financial education for students.
- Implemented secure storage and authentication workflows to protect user data and ensure compliance with COPPA and FERPA.
- Built WebSocket integrations for low-latency trading and interactive classroom updates with 500ms load times.
- Developed custom character animations using Rive to create engaging, interactive user experiences.
- Delivered for App Store deployment

JUNE 2023 – PRESENT

INDEPENDENT MOBILE CONSULTANT | THE BIG 3 LLC | REMOTE

- Architected an AI-powered dietary analysis app featuring on-device machine learning for personalized nutrient recommendations — sole developer from wireframe to App Store launch.
- Built a privacy-first menstrual cycle tracker with encrypted offline storage, interactive calendar, and push notifications — zero data leaves the device
- Reduced application bugs by 90% across client projects through comprehensive unit, widget, and integration testing suites
- Enabled Flutter/native interop by leveraging Dart FFI to execute C# logic within mobile applications, bridging .NET libraries into cross-platform workflows
- Accelerated deployment cycles through automated CI/CD pipelines, reducing manual release errors
- Integrated Firebase, deep linking, QR scanning, and offline storage across multiple production applications

Projects

NTWKD – Productivity Contact Sharing App

Cross-platform Flutter productivity app for streamlined professional contact sharing, live on both Apple Store and Google Play.

- App Store: <https://apps.apple.com/us/app/ntwkd/id6465403912>
- Google Play: https://play.google.com/store/apps/details?id=com.Morgana.youCard&hl=en_US&gl=US

- Built with Flutter and Firebase supporting real-time contact sharing and user profiles
- Implemented CI/CD pipeline for automated deployment to both platforms
- 100+ downloads

FITNESS & NUTRITION APPLICATION | GitHub: <https://github.com/goshornjustin/FitnessApp> | Personal Project

- Nutrition and diet Tracking with workout logging.

VIDEO CHAT APPLICATION | GitHub: <https://github.com/goshornjustin/ChatApp> | Personal Project

- Social app with live video chat, in app messaging between users, media sharing, location sharing.

Education

Bachelor of Science Management Information Systems | Penn State University

Application Development Concentration • Graduated December 2022
